

Sean Linkenheimer

Katy, TX.

N5LNK

POTA is about amateur radio operators visiting parks and making contacts from within the parks with other amateur radio operators at any location.

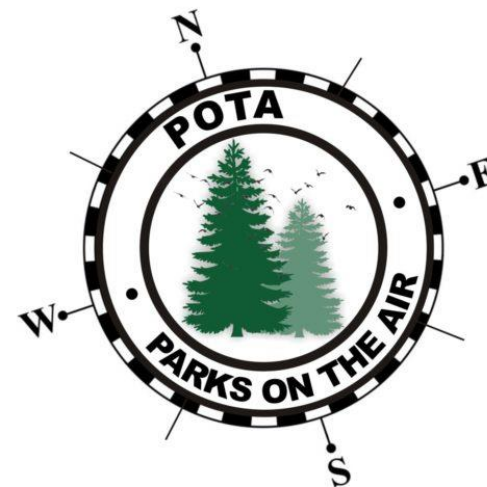

Getting Started for Hunters

Hunters are the individuals located anywhere, who contact the activators in the park. As a hunter, the rules are few and simple.

- Follow the law.
- Follow the [DX Code of Conduct](#).

The first place to start as a hunter is to head to <https://pota.app>. With an account you will see your progress towards certificates and awards based on the logs that the activators you contacted submit.

NOTICE On March 24-25, 2024, we will applying [changes to the remaining Programs](#).

Getting Started for Activators

Activators are the individuals that pack up their portable gear and head out to a park and set up a station. The rules for activators are fairly simple.

- Follow the law
- Follow the DX Code of Conduct

- Leave no trace
- Follow any instructions from park rangers you encounter
- Be courteous of the public space you are using
- You must have an account registered at <https://pota.app>
- You and all your equipment must be within the boundaries of the park(s)
- You must submit an ADIF log after your activation is complete.
- Follow the Rules detailed here (docs.pota.app)

What Radio?
 What antenna?
 What about power?

The top-left window shows the Yaesu FT-991A software interface. It features two VFOs: VFO A is set to 14.235.000 and VFO B to 14.356.000. A central meter displays 'S - Units' with a scale from 1 to 60. Below the VFOs are controls for 'RF' (I/O, AT-6, T-OFF, Tune, Simplex, CTSS E/D) and 'Filters' (Width 2400Hz, Shift 0Hz, NB, Nch-W 1220Hz, Cont, DNR, APF, Contour Width, Contour Level). A keypad window is open, showing a numeric keypad and an 'Enter' button.

The top-right window is an 'Audio Spectrum' analyzer. The title is 'Audio Spectrum (kHz)'. The x-axis represents frequency from 0.00 to 4.00 kHz. The y-axis represents amplitude. A blue waveform is visible, with a peak around 0.5 kHz. Below the spectrum are 'Attenuation' and 'Reference Level' sliders, and a 'Settings' button.

The browser window shows the 'Parks on the Air' website. The URL is 'pota.app/#/'. The page title is 'Parks on the Air'. There is a search bar for 'Search for Callsigns & Parks'. Below the search bar, there are buttons for 'SPOTS', 'ACTIVATIONS', 'DOCS', and a user profile for 'N5LNK'. A search filter shows 'SFI=201 A=8 K=6.00'. The main content area displays 'US-1916 Skyway Fishing Pier State Park' with a map and a list of nearby parks. At the bottom, there are filters for 'Band: 20M', 'Mode: SSB', 'Program: All', 'QRT: Hide', and 'Hunted: Show'. A table of recent contacts is visible, with columns for Time, Activator, Frequency, Park, Region, and Spotter.

The browser window shows 'N3FJP's Amateur Contact Log 7.0.9'. The URL is 'www.n3fjp.com'. The page has a 'Recent Contacts' section with a table of 703 listed QSOs. The table has columns for Call, Country, Date / Time, Bnd, Frequency, Name, Their Park, Off, and M. Below the table, there are fields for 'Call' (K6YYL), 'Sent', 'Rec', 'Their P' (US-4571), 'Name' (Kimberley), 'State' (CA), and 'Country' (USA). There are also fields for 'Date' (2024/03/24), 'Time On' (02:28), 'Band' (20), 'Frequency' (14.23500), 'Mode' (SSB), and 'Power' (100). A 'Comments' section is visible with 'Bearing: 289', 'Miles: 1,319', and 'Cont NA'. At the bottom, there is a 'Spot Last' button and a table of 'SKQDE' (Short QSO Data Entry) with columns for QSO number, frequency, location, and date.
